Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 January 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Holthaus et al-5,954,746 (Holthaus).

Holthaus (Fig. 1-11, for example) discloses ultrasonic probe/blade 20, ultrasonic transducer/oscillator 16/14, movable jaw 24, movable handle 26 arranged on the same side as the movable jaw 24 with respect to the central longitudinal axis of the main body 28, a cord connecting the ultrasonic transducer/oscillator 16/14 to a drive circuit (not shown), sheath 22, main body 28, pin 90 as 1st pivot shaft for jaw 24, 2nd pivot shaft 76 for handle 26 substantially as recited in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holthaus et al-5,954,746 (Holthaus).

As to claims 3 and 14, Holthaus does not explicitly disclose a drive circuit as recited in the claims. However, the drive unit as recited in the claims is well known in the art. For example, Honda-6,066,135 discloses a drive unit 1 (Fig. 1) having switch/setting portion 24, timer 35 (Fig. 9) to control the ultrasonic output and time of operation as recited in the claims. It would be obvious to one of ordinary skill in the art to provide Holthaus device with a drive unit circuit as recited in the claims in view of Honda-135, as this circuit is well known and suitable for controlling an ultrasonic output and time of operation of the device such as a Holthaus's device.

Response to Arguments

Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

As to claims 3 and 14, Applicant acknowledged a drive unit as recited in the claims is well known. However, Honda-6,066,135 is referred to as a proof to show that a drive unit as recited in the claims is well known.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3773

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
